

How to turn on keep inventory in minecraft game for single player mode!

Minecraft is a sandbox video game that allows players to explore, build, and survive in a blocky world. In single player mode players can save their progress and inventory in various other ways that has been a secret for the new gamers who are playing this game.

Now read this article in depth in order to get a clear picture about [how to turn on keep inventory](#) in minecraft for single player mode. Know all of those steps and start playing this game like a pro gamer.

Save and quit option:

One of the easiest to save your inventory in minecraft single player mode is to simply save and quit the game, before you think you may die. This can also be done by pressing the Escape Key of your keyboard.

When you press the Escape key you will get the option for save and quit in the menu. This will save your progress and inventory and you can easily resume the game from where you left off by selecting the single player option from the main menu.

Beds:

Players of Minecrafts know that Beds are a useful tool for saving your progress and inventory in Minecraft. When you sleep in a bed, your spawn point is set to that location, and your progress and inventory are saved. This means that if you die or exit the game, you will respawn at the bed location with all of your items. Beds can be crafted using three blocks of wool and three blocks of wooden planks.

Ender Chests

Ender chests are a type of chest that can be used to store items in Minecraft. The unique feature of ender chests is that they are linked to the player's inventory, which means that any items stored in the ender chest can be accessed from any other ender chest in the world. This makes them a useful tool for saving your inventory in Minecraft. Ender chests can be crafted using one eye of ender and eight blocks of obsidian. You can consider this as the best technique that will help you to learn how to turn on keep inventory in single player mode.

Shulker Boxes

Shulker boxes are another type of container that can be used to store items in Minecraft. They can be carried in the player's inventory, and they retain their contents when they are broken and placed elsewhere. This means that you can use shulker boxes to store items and transport them between locations. Shulker boxes can be crafted using two shulker shells and one chest.

Minecarts with Chests

Minecarts with chests are a type of transportation in Minecraft that can be used to transport items. They can be ridden by the player or pushed along by a powered rail. Minecarts with chests can be used to save your inventory by transporting items to another location.

Redstone Contraptions

Redstone is a type of material in Minecraft that can be used to create complex contraptions. Redstone contraptions can be used to automate tasks, such as farming or mining, and they can also be used to save your inventory. For example, you could create a redstone contraption that automatically sorts items into different chests based on their type. This would allow you to save inventory. In order to learn more details about how to turn on keep inventory follow this article and grab more details.

Hoppers

Hoppers are a type of block that can be used to transport items in Minecraft. They can be placed on top of or underneath other blocks, and they will automatically transfer items from one container to another.
